clearly one or
more boxes
within your
service level
column)

INVOICE, PAYMENT, PROLONGATION / CHANGING / TERMINATION BY USER

First Period: After receiving the registration form DI creates the account and delivers account information, a copy of the registration form and (in case of a chargeable service level) the invoice of the total amount. The invoice is to be settled within 14 days by bank transfer. After receiving the payment the initial password for the account is delivered. The first time period is 12 months.

For the following periods the registration may be terminated or changed by the user while submitting a note of termination or a new registration form by postal mail or telefax until 4 weeks before the beginning of the next time period. Otherwise the registration is prolonged without further notice. All following time periods are 6 months.

The user may opt for an upgrade to the next higher service level or for additional single services at any time. In this case a new registration form has to be submitted by postal mail or telefax, and the additional fee for the actual period will be invoiced.

Individual support contingents are to be used in the related time period, and they must not be transferred to the next period.

TERMINATION BY DI

If there is a breach of the agreement we will revoke your license to use the service and suspend your right of access immediately. In such case, no portion of your fee for the actual time period will be refunded.

Should we decide to suspend your subscription of service for any reason other than breach, we will notice you minimum four weeks in advance and then refund to you the unused portion of your subscription payment of the actual time period by bank cheque, which will be your sole and exclusive remedy upon such a suspension of service.
